

## Scenarios for current students

If someone has:

1. Already completed **CSCI111** & **CSCI121** they are not permitted to enrol in **CSCI103**.

These students should continue to follow the 2003 course schedules, if they began their degree in 2004. If they began it from 2005 onwards they should replace CSCI103 with 6cp subject @ 100 level.

2. Already completed **CSCI111** but failed **CSCI121** they are not permitted to enrol in **CSCI121** in Spring 2004, instead should enrol in **CSCI103** in Autumn 2004 & **CSCI124** in Spring 2004

These students should continue to follow the 2004 course schedules, if they began their degree in 2004.

3. Have failed **CSCI111** then they need to enrol in **CSCI114**, **CSCI103** & **CSCI124**

These students should continue to follow the 2004 course schedules, if they began their degree in 2004.

4. Have not completed **CSCI101** then they should enrol in **another 6cp subject at 100 level** (from Additional subject list for BInfoTech & General Schedule for BCompSc)

If the scenarios listed in 2 or 3 above, do not affect the student then they should continue to follow the 2003 course schedules, if they began their degree in 2004.

5. For a BCompSc student-If have not completed **MATH122**, then they need to complete **STAT131 + MATH121**

6. For a BCompSc student-If have completed **MATH122**, then they will be exempt from **STAT131** but must take 6cp @ 100 level to substitute for **MATH121**.
